

# Construction Activity On Subi Reef December 2021 to May 2022

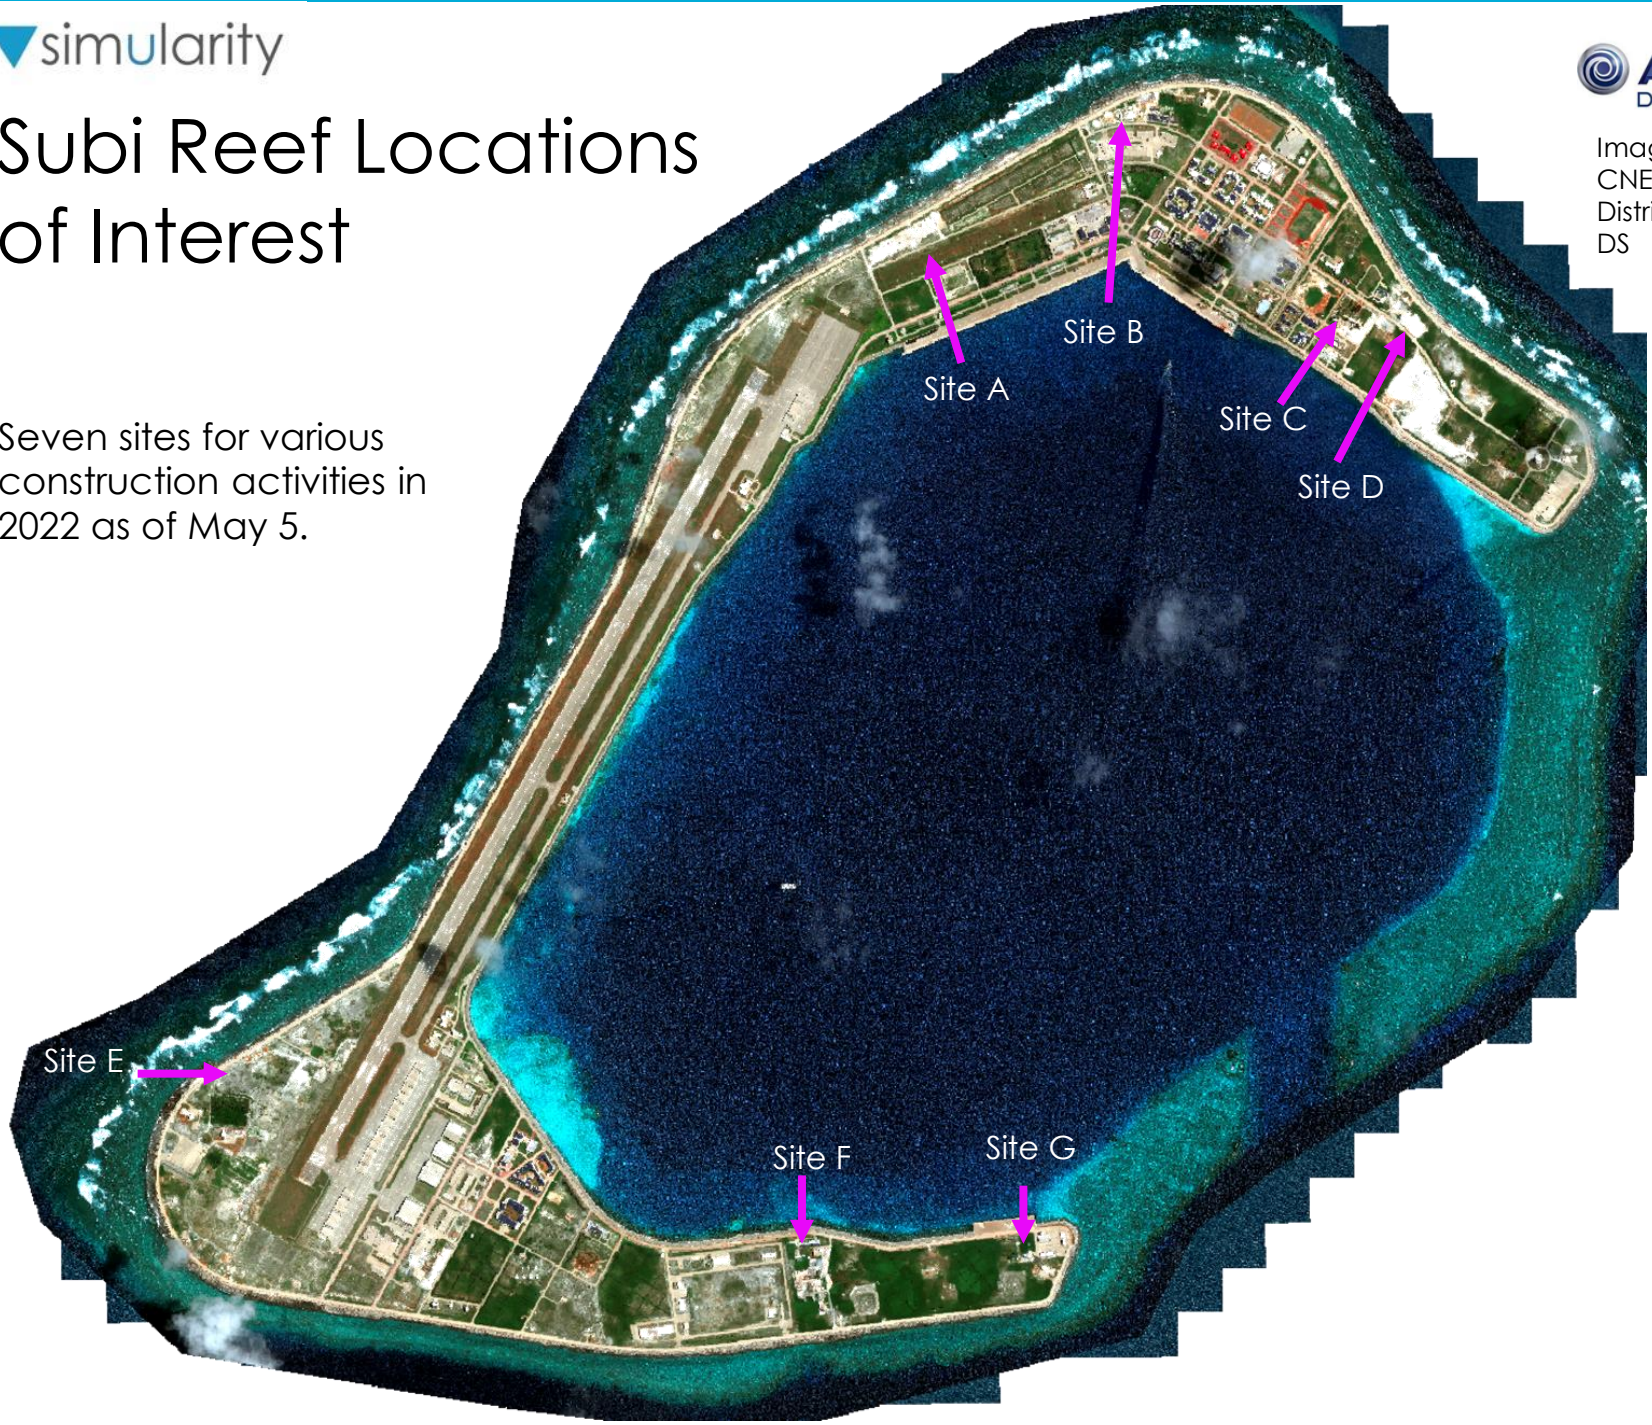

Subi Reef, occupied by the PRC, is just 13 nautical miles from  
Philippine-occupied Pag-asa (Thitu) Island

Analysis By Similarity  
May, 2022

# Subi Reef Locations of Interest

Seven sites for various construction activities in 2022 as of May 5.

# Subi Reef Site A

Location: 10.94031370, 114.08237273

March 7, 2021

Addition of sand, access paths, and a more geometric shaped probable foundation for construction between March and December 2021

December 15, 2021

# Subi Reef Site A

Location: 10.94031370, 114.08237273

# Subi Reef Site B

Location: 10.94428212, 114.08961070

Land clearing, apparent paths to road and materials stockpiles in progress, addition of sand, appearance of materials (rust colored, white, and gray) and equipment (rectangles near road are likely trucks that brought materials). Emerging white square shape may be a foundation.

December 15, 2021

May 5, 2022

# Subi Reef Site C

Location: 10.93799269, 114.09613596

Two green rectangular structures removed, brown central structure with red stripe constructed, path from road to central structure added, addition of significant amount of sand. The sand, trucks and/or storage containers (along inner strip of sand) may indicate construction is still in progress.

December 15, 2021

May 5, 2022

# Subi Reef Site D

Location: 10.93799276, 114.09745133

Presence of probable construction equipment (black colored), trucks (rectangles on road in first image), and materials (lumpy gray, rust colored, and white), addition of significant amount of sand. Emerging white rectangular shape indicates probable foundation.

December 15, 2021

May 5, 2022

# Subi Reef Site E

Location: 10.91530286, 114.06224239

Presence of structures and materials (rust-colored stockpiles), addition of significant amount of sand. Paths created to road and to location of material stockpiles are likely to facilitate use of heavy equipment. Emerging white squarish shape indicates possible foundation.

December 15, 2021

May 5, 2022

# Subi Reef Site F

Location: 10.90872474, 114.07865267

New wall and parking lots, and new possible temporary structures. Presence of equipment and additional materials may indicate construction is still in progress.

December 15, 2021

May 5, 2022

# Subi Reef Site G

Location: 10.90925288, 114.08558614

Changes to existing site may indicate maintenance, expansion, or addition of new features.
